Unbeatable experience and know-how...

# IMPLANTCENTER

Piezo • Ultrasonic • Surgery & Implantology Unit

Placement

- Highest torque of any micro motor on the market
- Widest speed range on the market
- Compatible with all contra-angles

Preparation

- Selective cutting for preservation of soft tissue
- Accurate irrigation for prevention of bone overheating
- Handpiece does not overheat and is vibration free

Maintenance and more...

- Carbon fiber tips for safe maintenance of implants
- Diamond coated and bladed curette tips for perio treatments
- Color coding system for easy tip and power selection

\*Magnetostrictive ultrasonic (Metal Stacks)

## PROPHY MAX

Piezo and Prophecy Combo

### The winning team...

- Biofilm to calculus - an ideal power mode for every situation
- Digital front panel with color-coded power settings
- The foot pedal can control everything- double foot control for hands-free operation
- Modular irrigation system (two 400ml containers) can be added at any time
- Plug and play: Easy to move from room to room
- Available with LUX (360° fiber optic handpiece)
- No more clogging! - The water remains separate from the powder up to the last instant!
- Air Max also available (air polisher only)

## SP NEWTRON POWER

### The first ever "cruise control" in ultrasonics!

- Easily integrated into your dental unit.
- Most versatile system available
- Scaling, Perio, Endo, Surgery, Restorative
- Thinnest tips on the market
- Less water = Better visibility, superior tactile sense and your patients stay dryer!

## SP NEWTRON LED

### The first ever ultrasonic handpiece with Autoclavable LEDs!

- Easily integrated into your dental unit.
- Autoclavable LEDs with 65,000 LUX!
- Most versatile system available
- Scaling, Perio, Endo, Surgery, Restorative
- Thinnest tips on the market
- Less water = Better visibility, superior tactile sense and your patients stay dryer!

# IN THE WORLD OF INTRA-ORAL CAMERAS, THERE IS ONLY ONE NAME YOU NEED TO KNOW... **SOPRO**

*The only camera  
with Shade-Matching  
Capabilities!*

## **SOPRO 717**

*The Camera that sets the tone...*

**SoproShade**  
*concept*

*4 Steps to success...*

A simple 4 step process will change the way to select the shades...forever!

**SOPRO**, the world leader in dental imaging, introduces the 1st-ever intra-oral camera which can be used as a shade device (provided by the patented SoproShade Concept)!

## **SOPRO 617**

*The Masterpiece...*

- Ultra light handpiece (less than 2 ounces)
- 8 LED Lighting - features integrated LED lighting / no fiber-optic
- 105° Angle of view
- Auto Focus - all adjustments are automatic
- SOPRO TOUCH - A simple touch on the camera handpiece freezes the image
- Multi-op - Can be utilized in several operatories since the camera handpiece can be easily connected and disconnected.
- Enables the freezing of one or four images on the video screen

### Step 1

Place the camera in the Sopro Shade position 1 and apply the autoclavable cap to the tooth. Isolating the ambient light allowing the tooth's "true color" to be displayed on the screen.

### Step 2

Simply slide your finger over the Sopro Touch sensor to capture the image... and the patient's tooth is captured on the left half of the screen.

### Step 3

Place the camera in the Sopro Shade position 2 and apply the autoclavable cap to the color chart. Compare the various color shades until you find the patient's shade. The shade sample will appear on the right side of the screen providing a side-by-side comparison... from top to bottom!

### Step 4

Once the result obtained is as close as possible to the tooth's natural color, all you have to do is lightly press the Sopro Touch again to freeze the image.

Works with 717 Docking Stations and single USB 2.0 Cable!

**Both the SOPRO 717 and SOPRO 617 Cameras can be easily integrated into your dental units**
